

21 November 1968

Tom,

25X1A I've been asked to present a paper on our War Game to the [REDACTED] next month. The audience would be about 15-20 people in Working Group B-2, Operations Research
25X1A

[REDACTED] The key words relating to our War Game in the purpose of this working group are "uncertainty ... in enemy and threat ...". I visualize that the concept and methodology of the War Game would be described with only sample numbers to illustrate the type of output rather than "real (classified) data".

In the past I have found these meetings very worthwhile both for content and as an opportunity to maintain professional associations of potential help in recruiting.

25X1A I would plan to be away the week of the 9th of December, utilizing one day to [REDACTED] be brought up to speed on the developments in the last three months.

25X1A
[REDACTED]
